

System & Unit Test Report

Product Name: tabspace

Team Name: team tabspace

11/19/16

Sprint 1, User Story 1:

As a student, I want to be able to tell my browser whether I'm doing schoolwork or socializing so that it can open only relevant tabs and block certain sites accordingly, so that I can study more efficiently and be less distracted.

1. Click the tabspace button on the top right of the browser window.

2. Click on 'Create'
3. Enter the following on the form:
 - o title: "Schoolwork"
 - o add tabs: "piazza.com" <ENTER> "my.ucsc.edu" <ENTER> (continue for any other desired URLs to be added)
 - o block tabs: "facebook.com" <ENTER> "twitter.com" <ENTER> (continue for any other desired URLs to be added)
 - o Click submit
4. Click on the newly created tabspace to open up the tabs in a new window

Sprint 1, User Story 2:

As a worker, I want to be able to organize multiple work projects so that I can focus on one project at a time.
