

Working Prototype Known Problems Report

Product Name: tabspace

Team Name: team tabspace

11/20/16

Functions not working properly:

1. If you spam the 'Create Tabspace from Tabs' button sometimes it will save too many tabs in a tabspace.
2. Clicking near an image loads a near tabspace.
3. If you create a new tabspace from scratch with the same name as an existing one, it will initially show up as a new button. Once the popup is closed, the duplicate will disappear and the old tabspace will be overwritten.
4. If you create a new tabspace from scratch, blocking tabs with "www" in the url won't block certain sites that don't include "www" in its url. For example: blocking "www.twitter.com" will not block Twitter, since its url is https://twitter.com.
