

# SPRINT 2 PLAN

**Product Name:** tabspace  
**Team Name:** team tabspace  
**Sprint Completion Date:** November 4, 2016  
**Revision Number:** 1  
**Revision Date:** October 24, 2016

## Goal

Complete and improve the foundation for tabspace:

1. Be able to save tabs into one group.
2. Be able to edit tabspaces.
3. Build basic UI to handle viewing, creating/editing, and saving tabspaces.

## Task Listing

### User Story 1

As a student, I want to be able to tell my browser whether I'm doing schoolwork or socializing so that it can open only relevant tabs on startup and block certain sites accordingly, so that I can study more efficiently and be less distracted.

Task 1: Save tabspaces as keys to the dictionary as "tabspaceX" where X is the number of the newest tabspace (10 hours)

Task 2: Create a load tabspace button that opens all of the previous tabspace buttons that were created. (10 hours)

Task 3: Refactor the code we have, and merge it all together. (10 hours)

**TOTAL: 30 hours**

### User Story 2

As a tabspace user, I want to be able to edit my tabspaces easily so that I can update my tabspaces as my browsing preferences change.

Task 4: Debug existing code to allow for editing of tabspaces. (10 hours)

Task 5: Build UI to handle editing tabspaces. (10 hours)

**TOTAL: 20 hours**

## Team Roles

Cameron Wright: Product Owner

Brian Tang: Developer

Winnie Nguyen: Developer

Evan Hobbs: Scrum Master

Kevin Pannell: Developer

## Task Assignment

Cameron Wright: Task 3

Brian Tang: Task 2  
Winnie Nguyen: Task 5  
Evan Hobbs: Task 4  
Kevin Pannell: Task 1
